

SUSTAINABLE FUTURES FOR TRADITIONAL BUILDINGS

WORKSHOP DAY AT THE HAINING, SELKIRK

by the **Scottish Traditional Skills Training Centre** in association with **Selkirk CARS**

In recent years a number of 'at risk' buildings have become the subject of high profile 'Heritage Rescue' operations resulting in their successful adaptation to a range of alternative uses. For each of these 'Success Stories' there are many other buildings which at present face an uncertain future.

The **Scottish Traditional Skills Training Centre** in association with **Selkirk Conservation Area Regeneration Scheme (CARS)** has therefore brought together 4 leading experts to look at the basic principles and critical factors which must be addressed when identifying potential sustainable futures for a range of traditional buildings.

Kit Martin - Leading authority in securing a future for a wide range of traditional buildings

Marcus Binney - Founder of SAVE Britain's Heritage and leading conservation campaigner

Paul Higson - Project Manager for The North East Scotland Preservation Trust

Pauline Megson - Project Development Manager with Historic Environment Scotland

The event will also include a series of brief presentations in the form of 'case studies', provided by representatives of organisations currently in the process of identifying a use for a specific building without an assured future. Each of these presentations and case studies will be followed by a Q&A session and a facilitated discussion.

Date: **Thursday 25th MAY 2017** Time: **9.30am – 4.30pm**

Cost: **£35 Per Person** - *Includes Tea/Coffee and Lunch*
