

Sustainable Procurement Charter

Scottish Borders Council aims to be a responsible purchaser of goods, services and works. We set standards to make sure we undertake our activities in an ethical, responsible and sustainable way. This charter lays out a number of important principles and policy requirements of the Council to which we expect our suppliers to comply.

Achieving our Sustainable Procurement duty

Equalities

We view the Scottish Borders as a place where everyone matters, where everyone should have equal opportunities and where everyone should be treated with dignity and respect. As a responsible employer the Council is committed to promoting equal opportunities to all of the Scottish Borders community, employees and suppliers alike. Consideration of equal opportunities is fully integrated into our procurement practices and is fully committed to the values and ethos of the Equality Act 2010.

Disability Confident Scheme

The Council is an accredited Disability Confident employer. We are committed to the aims of Disability Confident and would encourage our partners, suppliers and providers to demonstrate their commitment to the scheme and also become accredited Disability Confident employers. As appropriate, contracts or framework agreements may include clear performance indicators relating to the positive benefits of such a scheme.

Facilitating SME's, third sector and supported businesses in the procurement process

Our procurement strategy aims to achieve a mixed economy of suppliers to support and develop our local rural market, particularly micro, small and medium sized enterprises, Third Sector organisations and supported businesses. This approach includes simplified and standardised public sector procurement practices, consideration of lotting and a range of hands-on assistance to the local supply chain to help reduce any barriers to involvement in procurement opportunities.

Promoting Innovation

Influencing the market towards innovative solutions can focus public spending on sustainable goods, services and works and create an important catalyst for local job creation, sustainable innovation and market development. Our procurement strategy notes the importance of innovation through procurement and we encourage all our suppliers to consider an innovative approach to the way goods and services are delivered.

Fair Work

The Council is committed to encouraging the adoption of Fair Work Practices. When relevant, suppliers bidding for public contracts should adopt fair working practices, specifically: appropriate channels for effective voice, investment in workforce development, no inappropriate use of zero hours contracts, action to tackle the gender pay gap and create a more diverse and inclusive workplace, providing fair pay for worker, offer flexible and family friendly working practices for all workers, oppose the use of fire and rehire practices. As an accredited real living wage employer the Council is committed to encouraging the wider adoption of the real living wage. This is an hourly rate set by the living wage foundation. The current rate is £13.45. (October 2025).

Consultation with Stakeholders

Service User and, where appropriate, wider community consultation is an integral part of commissioning considerations. The strategic importance and complexity of required outcomes will mainly govern the level of consultation undertaken and the choice of the procurement route followed. The final decision on these matters will always be considered in light of what is likely to provide best value for the local community.

Health & Safety Compliance

The Council is committed to achieving a culture that ensures it complies with all current Health and Safety legislation and in so doing endeavors to provide safe places and safe systems of work. This principal extends to those employed to do contracted works for and on behalf of the Council. The Council will only employ contractors who are SSIP accredited.

Fairly & ethically traded goods

The Council supports the Fair Trade initiative because it reflects our commitment to sustainable development and offers the prospect that marginalised producers across the world will receive fairer deals for their produce. The Council will promote the use of fair trade products across all its services and raise awareness of fair trade amongst its staff and customers. The Council will (to the extent permitted by EU procurement legislation) embed Fair Trade into contracts with suppliers where it has a direct bearing on the required goods, services and works.

Provision of Food

The procurement of food considers the wider community focus of improving the health and wellbeing of young people and communities in the Borders. Promoting a sustainable food supply chain by (where possible) the use of Scottish produce through collaborative contracts supports the delivery of healthy choices to support healthy eating. Food security and ethics are of equal importance and the Council follows Scottish Government guidance to ensure consideration of the highest levels of animal welfare.

Prompt payment

The effect of late payment on SME's can be significant, impacting cash flow and the ability to trade. As direct support the Council has a prompt payment policy and related performance indicator which aims to make payment of invoices within 30 days of receipt of a valid invoice. To make sure this policy flows through all stages of the supply chain, our terms and conditions of contract obliges our contracted suppliers to make payment of valid invoices within a similar 30 day period.

Information/Data Management/Protection

The Council regards information as a valuable corporate asset which must be obtained, processed and protected diligently, lawfully and ethically. The approach to information governance focuses on safeguarding customers, providing business transparency and ensuring legislative compliance. Relationships with 3rd parties who handle data on behalf of the Council, or with whom we share data are carefully managed. Contracts include information governance compliance conditions with these arrangements being documented and monitored. We will expect all suppliers to take the same robust approach to information management as we do, even after their contract has expired.

Environmental Impact and Climate Change

The Council is committed to reducing its environmental impact, including carbon emissions, wherever possible. The Climate Change (Scotland) Act 2009 places duties on public bodies to deliver their services in a way which supports this, including both internal activities, such as energy saving within buildings, and its work with partners. The way that the Council procures goods and services can have a huge environmental impact, and by purchasing items which can demonstrate a reduced negative effect on wildlife, natural resources and carbon emissions, we can reduce our carbon footprint and support suppliers to do the same.

Improving the economic, social and environmental wellbeing of the area

Adding Value to Communities through Community Benefits or 'social' requirements in public sector procurement is intended to ensure that wider local economic and social issues are considered when delivering construction works, service or supplies contracts. This is achieved through the inclusion of specific clauses within contracts known as community benefit clauses.

Conflict of Interest

Council Officers and Members conducting business on behalf of the organisation have a responsibility to do so in a manner that is objective and ethical. As such we require any individual whether employee or supplier to declare such an interest before any procurement activity commences as the best way to handle conflicts of interest is to avoid them entirely.

Modern Slavery Act 2015

The Council adopts a zero tolerance approach to modern slavery and human trafficking. We expect all those who work for and with us to adhere to this approach. As appropriate we will address areas of concern in the tendering process through requiring minimum standards and contract management.
