Subject: Local Development Plan Consultation - main issues- Cheviot locality: alternative option: Eckford

We refer to page 51 of the main issues report, site reference AECKF002 land at Black Barn Eckford.

We have only been notified today of this inclusion in the draft plan and understand the deadline for comments is today. We have therefore not been able to give this issue the full consideration it requires. Our initial view is that redevelopment of the current site would be advantageous but we have strong reservations about this alternative option for housing related to the following issues:

Site capacity of 10 which seems far, far too dense

Entrance to the site and associated footways

There is no foul drainage infrastructure available in the village

Possible contamination of the site

Please keep us informed of the position in relation to this "alternative option".

Regards
